COVID-19 TIME LIMITED COMPETENCY PROGRAM FOR THE MEDICAL SURGICAL PATIENT

One strong, united voice for nurses and patients.

Learning Outcome:

Participants will be able to identify current standards of Medical Surgical nursing practice for the COVID 19 patient and apply them to selected patient conditions.

Program Objectives:

- Discuss the impact of stress on nursing practice during the COVID-19 Pandemic.
- Self-identify individual knowledge and practice level for medical surgical skills.
- Discuss the ongoing signs and symptoms of COVID-19 patients in comparison to other respiratory illnesses.
- Discuss the impact of select co-morbidities on patients with COVID-19.
- Recognize the imaging and laboratory tests and expected findings for COVID 19 patients.
- Select the appropriate nursing assessments, findings, and interventions related to the respiratory status of COVID-19 patients.
- Discuss the appropriate nursing assessments, findings, and interventions related to the cardiovascular status of COVID-19 patients.
- Apply the appropriate nursing assessments, findings and interventions related to the COVID 19 patient who develops acute renal failure.
- Discuss the latest information related to current medication and treatment, nursing management related to COVID 19 patients.
- Discuss the appropriate nursing assessments and interventions related to the gastrointestinal system for COVID 19 patients.
- Describe the long-term impact of COVID 19 on select body systems.
